

BIZ.

The Business Operating Agent for Claude

INSTALL GUIDE

Created by Lommatsch · www.lommatsch.com

Biz turns Claude into a business operating agent: part COO, part consultant, part systems advisor, part program coordinator, part growth advisor. It remembers your business between conversations, follows up on its own advice, and runs a weekly operating rhythm so nothing slips.

Setup takes about 10 minutes. No technical skills needed.

Before you start, you'll need

- The **Claude desktop app** with **Cowork** (Claude's workspace mode). Download at claude.ai/download.
- A paid Claude plan (Pro, Max, Team, or Enterprise).
- The **biz.skill** file, from the person who shared it with you or from www.lommatsch.com.

Installation

1 Save the skill

1. Open the Claude desktop app and start a **Cowork** session.
2. Drag the **biz.skill** file into the chat window (or attach it with the paperclip).
3. Click **Save skill** on the file card that appears.

Tip: You can view or remove installed skills anytime under **Settings** → **Capabilities**.

2

Connect your tools (optional, but each one makes Biz smarter)

In your Claude settings, open **Connectors** and connect any of these:

Connector	What it unlocks
Google Calendar	Meeting load, upcoming commitments, prospect-facing time
Gmail	Spotting work owed, stalled conversations, client threads
Google Drive	Reading your business documents and plans
Granola	Meeting notes become decisions, commitments, and blockers automatically
QuickBooks	Live cash, margin, and financial health
HubSpot	Real sales pipeline data

Don't worry about connecting everything. Biz works with whatever you give it and tells you honestly when it's flying blind. You can add connectors later at any time.

3

Run first-time setup

1. In a Cowork chat, type: `biz – set me up`
2. **Choose a folder** when asked. This is where Biz keeps its memory of your business, in plain files on your own computer. You own them and can read them anytime.
3. **Tell Biz about your business.** Two options:
 - **Faster:** point it to a folder of documents (P&L, contracts, invoices, org chart). Biz drafts its understanding and you correct it.
 - **Simpler:** answer a short interview, about 15 minutes.
4. **Approve the scheduled check-ins** when offered: a daily silent watch, a Monday morning briefing, a monthly review, and a quarterly planning session.

4

Take it for a spin

- Type `biz` for your first business health check.
- Try `advise – should I raise my prices?` for a taste of the consulting side.
- Try `stack audit` to review your tools and where AI could save you hours.

If something isn't working

Problem	Fix
Biz doesn't respond to "biz"	Say it explicitly: "use the biz skill and give me an ops review."
A connector isn't found	Check your Claude connector settings; some tools need a one-time authorization.
Biz has a fact wrong	Just tell it. It corrects its files and remembers the correction.
You want to start over	Delete the Biz workspace folder you chose in Step 3 and run setup again.
